Wale to Miss Ann McHugh, given for the purpose, the former of which , and the various articles on exhibition posed of. The fore part of the day was disposed of. The fore part of the day was occupied by the judges in the various departments in inspecting the articles and stock entered for competition, at all times a difficult and delicate task, but seldom or never performed to the entire satisfaction of all concerned. However, we believe on this occasion very little desatisfaction was, either felt or expressed at the results of the judges' labors.

Daisy Paodorn. rery little desatisfaction was either felt or expressed at the results of the judges labors. In the live stock department, some very fine animals were shown, but in some respects there was a falling off, as compared with previous exhibitions. We think we are justified in saying the show of horses was better that for years past. Mr. J. Kelly's span of brood mares was much admired, and would be a credit at any show, and the same we might say of a team exhibited by Mr. Switzer, of Belmont. Mr. Kelly also had on the ground a very fine two year old Olydesdelle filly, which was justly awarded a prize Of horned cattle, there was a very fair display. Mr. W. Hunt, of Metchosis, had on the ground a very fine two year old thorough bred Durham built, to which the first prize was given. Several well fired cows were on the ground, Capt. Walker and Mr. Thos. Lee taking the first and second prizes respectively. Of spring was them were avera shewn, and all supparations the first and second prizes respectively. Of spring Vegetables. well fired cows were on the ground, Capt. Walker and Mr. Thos. Lee taking the first and second prizes respectively. Of spring calves there were seven shewn, and all apparants well bired animals. The exhibition of sheep was not in point of numbers so good at we have hefore wineseed, atthough some fine specimens were shewn. They were all of the Sauthdown variety, which seems to be in high tayen. Byttish. Columbia. Of swine, there was a very great falling off indeed-probably boo hair a dozen amples of wheat, bariley, outs and pens, which here testimony to the adaptability of our soil and climate for the production of the harder descriptions of graige. Mr. Furit, of New Westminster, exhibited a sack of horse beans, the only thing of the kind grown in the Province. It is an article highly valued as food for horses. The exhibition of vegrables, in respect of quality, could scarcely be excelled. In this department, Mr. S. Herring, of New Westminster, was a large exhibitor, and gave oou'ra demonstration of the fertility of the soil on the hands of the 'mensel', and the Liverpool red, which the heat the Liverpool red, which attracted some sitention on account of their great size and upon. Of butter there was a fair show, Mr. D. Ferra, of New Westminster, varied of the first price both for fresh and tub. The show of fruit was first class, the principal exhibitors being Messrs. Trounce, Income of the show of fruit was first class, the principal exhibitors being Messrs. Trounce, Finnerty, and S. Herring. In manufactures if the show of fruit was first class, the principal exhibitors being Messrs. Trounce, Finnerty, and S. Herring. In manufactures if the show of fruit was first class, the principal exhibitors being Messrs. Trounce, Finnerty, and S. Herring. In manufactures if the show of fruit was first class, the principal exhibitors the lambs of the 'manufactures in the show of the were greatly admired, and for which he was awarded premiums. Of boots and shoes Switser & Co. were large schibitores of very fine work. Mr.

W. and second prizes respectively. Of spring mired, and for which he was awarded premiums. Of boots and shoes Switter & Co. were large exhibitors of very fine work. Mr. Wm. Palmer, corner Government and Taten streats, and Mr. H. Mansell, of Government streats, also had on exhibition work from their establishments which for style and finish could acarcely be surpassed anywhere. Switzer & Co. also exhibited sweral samples of Isather manufactured by them Mr. W. Bryant had several mamples of horse-shoes on view from his establishment, of peculiar style and excellent workmanship. Messrs. Duck & Sandover and Messrs. Farr & Robertson each bad on grabibition some highly finished wagess and other articles of their manufacture, which did credit to their establishments. Of poultry there was a very excellent display, from the proud and haughty peacock to the consequential little bantam, including ducks, green, tarkeys, dorkings, Brahmas, etc. In the fine arts and fancy—work department there was a really creditable show. We would notice particularly a piece of raised work by Miss M. A. Cameron, hair work by Mrs. Jewell, shell work by Mrs. Butler, water colors and crayons by Miss Charity, It years of age, a pupil of Mrs. Atwood, of Johnson street; four designs in seawed, the handlwork of Mrs. Dr. Balley, and photographs by Mrs. Maynard. We would bere meation that Mr. M. T. Johnson exhibited a very fine saddle horse, which was admitted to be the best in his class, but owing to some informality in entering him a prise was not awarded him. On the whole the Exhibition may be considered a decided success. At one o'clock in the afternoon the doors were trown open to the public, and from that hour until nearly six e'clock the hall and the grounds were crawded with ladies, gentlemm, and children, who flocked in to witness the exhibition. During the afternoon of the Prince Al fred, came up in her on this trip.

Mr. Waldron has in contemplation a profes-

leave for New Westminster this morning at who recently went home invalided.

Ma. BERMINGHAM, owner of the Prince Al-

Railway mentions the following striking facts: "The distance from San Francisco to New York, by the Union Pacific Railway, is 3,363 miles; while from New Westminster to Montreal it is only 2,730, or 633 miles in favor of the Canadian route. A closer examination of the table will show that by the construction of the Canadian Pacific Railway, even New York, Boston, and Portland will be brought from 300 to 500 miles nearer the Pacific Coast than they are at present. When the remarkable engineering advantages which appear to be obtainable on the Canadian line, and the very great reduction in mileage above referred to are taken into consideration, it is evident that the Canadian, in entering into competition for the through traffic between the two oceans, will possess in very high degree the essential element of success." The line of the Northern Pacific Railread between the same points not only shortens the distance, but crosses the mean line, and in this, as also in the matter of the snow range, has a great advantage over both

THE RAISING OF THE COLUMNS OF THE S. MINT .- Yesterday three of the large stone columns for the front of the Mint, were placed columns for the front of the Mint, were placed in position. These monsters are each chiseles of out of one solid piece of rock, and weight thirty tons. They are over thirty feet high and have a diameter of four feet. The base of each column weighs seven tens, the cup above five tons. It will take about two weeks more before the other three will have teft the mason's hands and be placed in position. The Mint building is now rapidly appreaching completion, and it is expected that it will be ready for the reception of machinery by May 1873. The copper for the roof, amounting to 17,000 pounds, has been received during the week. The building had its construction commenced three years ago

The Hongkong Press of August 23rd says:
At a quarter past nine o'clock last night the fire alarm was roug, and the word passed with the rapidity of lightning that the matshed building at Syingoon, in which the Chinese exhibition was displayed, had caught fire. One glance on entering the street verified the statement, as westward there shone a vast blaze of light, which rapidly increased in magnitude, lighting up the whole district, and bringing out the contour of the hill as though the sun were shining upon it.

Whatever could be done was at once undertaken, but unfortunately little or no assistance could be rendered, as the flames spread with so much rapidity that within a quarter of an hone of the fire breaking out the whole building was one mass of flaming ruins.

The origin of the fire was from the heat of one of the large chandellers, which ignited
